Issued Date: 07/07/2025

**Material/Product:**

Monochloramine Generator

**Contact Temperature:**

23 ± 2°C

**Models:**

iChlor

iChlor is a stand-alone water quality monitoring system which measures the oxidation state, temperature and pressure levels of potable water which has been treated with monochloramine from a chemical generator. The Certification for this product is for a stand-alone device only; it will not evaluate control or otherwise adjust chemicals entering the water stream from a chemical generator. Certification only includes the internal components of the measuring device. No components located externally to the enclosure are included.

Product certified to NSF/ANSI/CAN 372 conforms to the requirements for "Lead Free" plumbing products as defined by California, Vermont, Maryland and Louisiana state laws and by section 1417 of the US SDWA.
